I'm a system and computer engineer from the Universidad de Caldas (CO), with over 3 years of expertise generating code for industries in the following sectors: (Hospital, Sports, General Services, Tourism and low cost airlines) as well as university teaching.

I consider myself a dynamic and creative person, passionate about topics such as backend, frontend and databases. I enjoy teamwork using agile methodologies. What I am looking for is to continue growing technologically and to contribute innovative solutions to work challenges.

## ***Skills:***

- Python (Flask, Django, Pandas).
- Ruby (Ruby On Rails).
- JavaScript (NodeJs, Angular, TypeScript, RXJS).
- Java (Spring boot).
- PHP.
- API.
- MVC, DDD, Microservices.
- HTML5 (HTML, CSS, Js, JQuery, AOS, Bootstrap).
- Docker.
- SQL (PLSQL, MySQL, Postgresql, SQLserver, SQLite).
- NOSQL (MongoDB, Firebase).
- GIT & GITHUB, AWS.
- SCRUM.
- LINUX.
- ChatGPT.
- Testing (JUnit, Jest, Mockito).

## ***Expertise:***

**Project:** FACIRES (March 2024 - Current)

<https://sci-wiki-d4a329b13e00.herokuapp.com>

**position:** Backend Developer.

**Goals:**

- Implementation of a middleware system.
- Protection of API with interceptors (Auth JWT).
- Endpoint to generate work certificate in PDF (Base64) from .docx
- Implementation of QA system JUnit.
- Automatic code generator.
- CronJOBS python for Backup of DB from firebase.
- Architecture DDD.

Keywords:

Server, DDD, API, SQL, FIREBASE, Base64, Backend, Java, Spring Boot, CronJOBS, GCA, JWT, Junit

**Company:** Deporty (January 2024 - August 2024)

<https://deporty.com.co/>

**Position:** FullStack Developer.

**Logros obtenidos:**

- Implementation of QA system Jest.
- LOG system.
- Develop use cases from backend to frontend.
- Angular material.
- Data model in firebase.

Keywords:

Server, JavaScript, TypeScript, RXJS, Angular, Angular Material, NodeJs, Microservices, CI, FIREBASE

**Company:** Universidad de Caldas (February 2024 - October 2024)

<https://www.ucaldas.edu.co/>

**Position:** Introduction programming teacher, POO teacher, Database teacher, Software architecture teacher, QA teacher.

**Logros obtenidos:**

- Teaching computational thinking to new generations.
- Teaching software architecture and design patterns to new generations.
- Teaching how to plain software projects to new generations.
- Teaching how to test a software code and project to new generations.
- Algorithms.
- SQL/PLSQL.
- MongoDB.
- Java & Python.
- JUnit.

Keywords:

Teach Basic programming, Java, JUnit, Python.

**Company:** Newshore Manizales Caldas (Noviembre 2023 - Diciembre 2023)

<https://www.newshore.es/>

**Positions:** FullStack Developer.

**Logros obtenidos:**

- Setting Frontend from UMBRACO (.NET).
- Deploy (AzureDevops)
- Solve BUGs API (.NET).
- Solve BUGs FRONTEND (Angular).

Keywords:

.net, C#, Angular, AzureDevops, GIT, API, FRONTEND

---

**Company:** Hospital departamental San Rafael de Risaralda Caldas (April 2023 - July 2023)

<http://www.esehospitalsanrafael.gov.co/>

**Position:** Head of IT.

**Goals:**

- Automatic reports of patients (Hospital KPI) (SQL, CNT, Python).
- Server Guard (Windows Server).
- Database Backups (SQL).
- Correction of budgetary movements (SQL).
- Correction of medical records and laboratory results (SQL).

Keywords:

Python, SQL, Postgresql.

---

**Company:** Testeando SAS Manizales (August 2021 - December 2022)

<https://www.netactica.com/>

<https://turismoj.co/>

**Position:** FullStack Developer.

**Goals:**

- Trigger system to warnings (Admin, Clients, y providers) (Ruby)
- Creation of landing pages and views for new clients (Ruby, .erb)
- Automatic report of sales KPI (sales, reservations, sales intentions.) (SQL, Python, BI)
- Configuration of docker-compose for node updates.
- Deploy (Ruby - capistrano)
- Server guard (Linux)
- Solution of BUGs (API, FRONTEND, BACKEND) (Ruby)
- Implementation of recaptcha (Ruby, Recaptcha)
- Code review to lighten the server load CPU+RAM (Ruby cron jobs)
- Integration of nother API (MAPPING PRODUCTS) (Python, .csv)

Keywords:

Ruby on rails, API, BI, HTML, linux, Docker, python, SQL, GITHUB, deploy

---

**Company:** Rebold Manizales (August 2018 - August 2021)

<https://letsrebold.com/es/>

**Position:** Unlayout.

**Goals:**

- Knowledge of layout/grid system for newspapers, websites and advertising.
- Knowledge of display ad sizes.

Keywords:

Grid, layout

**Education:**

Universidad de Caldas (2014 - 2022)  
System and computing engineer  
Manizales, Caldas, Colombia.
